INFORMACIÓN RELATIVA A LOS LOTES

Lote N° 1

DENOMINACIÓN Waste water network operations support framework (north)

1) BREVE DESCRIPCIÓN

The works and services to be provided by the successful applicant are principally blockage clearance, flooding and pollution prevention, site clean up and other associated waste water network operations support.

2) CLASIFICACIÓN CPV (VOCABULARIO COMÚN DE CONTRATOS PÚBLICOS)

90470000, 45232410, 90480000, 90491000

3) CANTIDAD O EXTENSIÓN

DCC require the establishment of a number of call off framework agreements with a maximum of 3 contractors in this region who can provide reactive network operations support. This service will augment DCC's existing waste water network operational service provision. This includes, but is not limited to blockage clearance, flooding and pollution prevention, site clear up, site investigation, alarm responses, managing the customer interface, provision of management information. The successful applicants shall be required to work with and may be managed by DCC or it's primary waste water network operations contractors.

Service delivery will include general reactive maintenance and shall include provision of an emergency (24 hours a day/ 7 days a week) call out response. DCC may require provision of an appropriate scheduling mechanism and noticing activity as required by the Traffic Management Act (2004). The successful applicant will be required to work with DCC to ensure that the most appropriate system of scheduling of necessary works to meet customer and operational requirements. Due to the nature of this agreement DCC may require Contractors from the waste water networks operations contracts to manage this agreement.

Lote N° 2

DENOMINACIÓN Waste water network operations support framework (south west)
